

imageProcessor

```
graph BT; lanes[lanes] --> imageProcessor[imageProcessor];
```

A UML class diagram illustrating a generalization relationship. The 'lanes' class is represented by a gray-filled rectangle at the bottom, and the 'imageProcessor' class is represented by a white-filled rectangle at the top. A solid blue arrow points from the 'lanes' class to the 'imageProcessor' class, indicating that 'lanes' is a specialization or subclass of 'imageProcessor'.
